

AHMET KOÇ

Senior Full-Stack Software Developer — Team Lead

Ankara, Türkiye (Remote) | +90 538 842 9055 | koc-ahmet@outlook.com

SUMMARY

Senior Full-Stack Software Developer and Team Lead with 6+ years of experience delivering enterprise-scale, regulatory-compliant banking systems. Currently co-leading a 12-person squad at Garanti BBVA Teknoloji on a mission-critical teller withdrawal & deposit modernization program, transforming legacy COBOL/mainframe flows into resilient Java/Spring Boot microservices. Strong in distributed architecture, gRPC communication, event-driven design, and legacy reverse engineering — with a track record of mentoring engineers and unblocking delivery across the team.

CORE SKILLS

Languages & Frameworks: Java 17–21, Spring Boot, Hibernate, Hazelcast, React, JavaScript, HTML5, CSS3

Architecture & Integration: Microservices, gRPC, RESTful APIs, RabbitMQ, Event-Driven & Orchestration Patterns, Idempotency, DTO/Mapper Design

Data: Oracle, IBM DB2, PostgreSQL, PL/SQL

Legacy & Modernization: COBOL Analysis & Reverse Engineering, Mainframe Modernization, System Migration

DevOps & Quality: Maven, Git, Jenkins, SonarQube, Bitbucket, Cucumber, Karate, JUnit, JMeter, TLS/mTLS

Observability & Process: Splunk, Dynatrace, Instana, Elasticsearch, Scrum/Agile

AI-Assisted Development: Leveraging LLM-based tooling for code generation, review, and legacy (COBOL) analysis workflows

EXPERIENCE

Garanti BBVA Teknoloji — İstanbul, Türkiye (Remote)

Senior Full-Stack Software Developer — Team Lead

Apr 2025 – Present

Money Withdrawal & Deposit Modernization Project (via BilgeAdam)

- Co-lead a 12-person squad (2 team leads, 8 developers, 2 analysts) delivering a high-volume, nationwide teller withdrawal & deposit platform on a microservices-based banking architecture.
- Reverse-engineered virtually all COBOL programs on the withdrawal side to design and implement equivalent Java 17–21 / Spring Boot microservices.
- Designed and built 10+ backend services with 30+ system and external integrations, communicating over gRPC and REST.
- Reduced transaction-completion latency by ~2s on the backend and ~1s on the frontend through targeted performance optimization.
- Architected a RabbitMQ-based event-driven, asynchronous processing model for resilient, decoupled transaction flows.
- Delivered MFDC integration and an audit/observability pipeline using Splunk for regulatory-compliant traceability.
- Drove architectural decisions in direct collaboration with the client; owned the code-review gate and enforced quality standards.
- Acted as the primary technical escalation point, unblocking ~30% of the team's stalled tasks; mentored junior developers and trained analysts.
- Designed idempotent transaction handling, fault-tolerant orchestration, and DTO/Mapper layers aligned with enterprise banking standards.

Software Developer

Oct 2023 – Apr 2025

Garanti Advanced Signature Project — BDDK Compliance (via Eteration)

- Developed and tested gRPC and REST services for Mobile Login and Security Server systems.
- Transformed mainframe servers into modern Java-based services, updating transaction-signing flows to meet BDDK regulatory standards.
- Designed caching and transactional service structures; managed Oracle and IBM DB2 integrations through service layers.
- Authored Swagger/OpenAPI specifications, ran SonarQube analysis, and handled CI/CD deployments via Jenkins.
- Wrote unit, integration, performance, and functional tests; maintained enterprise frameworks including Ark Starter and Hazelcast.

Software Developer

Jan 2022 – Oct 2023

- Developed API services and delivered end-to-end software development from analysis through unit testing and handoff to QA.
- Introduced a reproducible development methodology that improved release quality and reduced defects by ~27%.
- Championed code reviews that caught defects early, accelerating go-to-market by 15%+, and streamlined integration testing.

Earlier Experience

- Software Developer — Sissoft & Erciyes Anadolu Holding (SAP transition projects), 2018 – 2020: built software features, supported SAP rollouts (Bellona, İstikbal, Mondi dealers), and delivered e-Invoice/e-Archive integrations.
- Lieutenant — Compulsory military service in a NATO unit, 2020 – 2021.

EDUCATION

B.Sc. in Management Information Systems (MIS) — Mehmet Akif Ersoy University, Burdur, Türkiye 2017

LANGUAGES

Turkish — Native English — C1, Professional Working Proficiency
